Meindl Production

85

Dear Business Partner,

Meindl has always stood for quality, tradition and innovation.

We feel committed to quality and stand by our name.

We live by tradition and maintain it in our footwear, just as we do in our business partnerships. Our true double-stitched boots in particular are full of tradition. These boots are produced at the highest level of workmanship and each pair is unique. Just as important to us is our partnership with you, our specialist retailers. Specialist retail has made us the brand we are today. We would like to thank you for this and would like to assure you that we will also be a reliable partner for you in the future.

Long-term partnerships with our suppliers are also important to us.

The best possible product only results if we all pull together.

We are celebrating a very special partnership in 2017. This partnership simultaneously reflects the power of innovation, which has always characterised Meindl.

35 years of Meindl – Gore partnership

MEINDL brought the first GORE-TEX® light alpine boot onto the market in Europe and has collaborated significantly in the developmental steps towards using GORE-TEX® material in shoes and boots. At that time, our father, Alfons Meindl, quickly recognised that the GORE-TEX® membrane could make a great contribution to revolutionising hiking and alpine boots when it came to lightweight yet waterproof footwear.

However, 35 years is a relatively short time span when you consider that we at MEINDL have a shoe-making tradition extending back over 300 years in Kirchanschöring. Yet in the last 35 years, there have been more innovations and developments in the field of boots than ever before in Meindl's history.

You can see our most recent innovation in our Meindl X-SO styles. Equipped with GORE-TEX® SURROUND®, these new styles achieve a level of climate comfort that has never been seen before.

In the coming weeks, we and our employees will be happy to show you how we experience these 35 years of partnership and are continuing to develop with new styles for 2017. Watch this space!

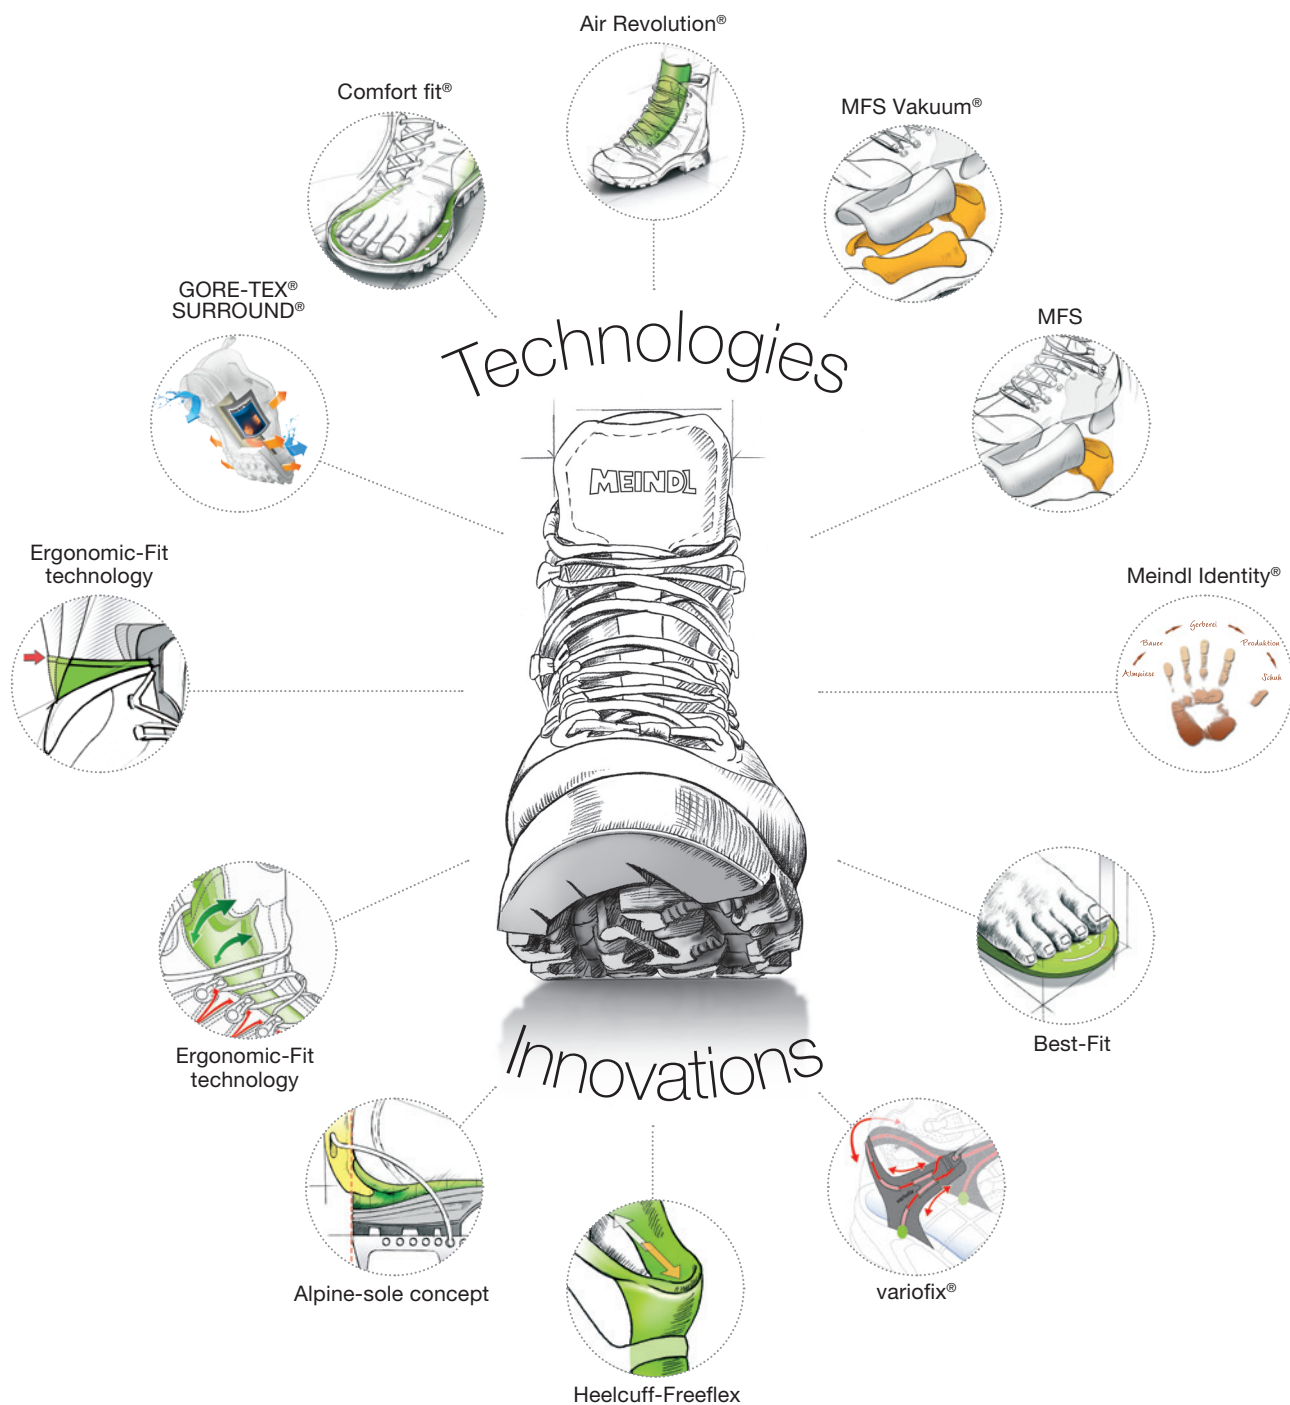

We look forward to continuing our good teamwork with you and wish you lots of success in the new season.

Your Meindl family

Meindl – A visionary in technology and innovation

Over the years, we have developed many technologies for the widest variety of uses. Our philosophy has always been to concentrate on the essential thing, which is the boot. Only in this way can we use our full range of skills for continuous improvements, new technologies and innovations.

Meindl would like to address all those people who like moving in the mountains and outdoors: Mountaineers, connoisseurs, relaxed hikers and families with children.

Types of use

By 1976 Alfons Meindl was already thinking of how to divide alpine boots into various areas of application in order to offer assistance in choosing the right pair of boots. Because the technical details, which classify a boot for a respective area of application, are often not visible from the outside.

Today this system has almost universal validity and supports those who are active out-doors in choosing the right boot. On the tongue of our boots you'll find the respective area of application in the form of a tag.

The boot for low level walking –
for those who want sturdy and fashionable Meindl shoes and boots for leisure and everyday wear.

Introductory boot for walking and trekking –
on high alpine pastures, in low mountain ranges and on maintained paths.

The trekking „classic“ –
for lengthy walks and comfortable hikes in a gentle alpine landscape.

Trekking boot for ambitious trekking –
in low alpine ranges and on fixed rope routes (light irons possible).

The alpine boot –
particularly stable for alpine trekking in rocky landscapes, on rock faces, scree and glaciers; suitable for use with crampons.

The ultimate alpine boot –
completely reliable for extreme use in critical landscapes, totally robust for use with crampons.

Competence from light multifunctional shoes to climbing

The MFS System

Thanks to the Meindl Memory-Foam System, the boots in this range provide a perfect fit for your feet. By matching different foam types in the ankle and cuff area, the boots can adapt to various foot shapes, once warmed by the body. The boots thus provide the best comfort and a perfect fit.

The MFS system is also used in the new edition the anniversary boot Altai GTX®. This style represents our celebrated 35 years of partnership with W.L. Gore.

The MFS principle

The MFS foam in the upper and the SOFT PRINT foam in the footbed adapt perfectly to the shape of the foot due to body heat and/or pressure.

A perfect, systematic fit

The fit and adjustment are the outstanding features of MFS[®] Vakuu[®] technology. The idea behind the MFS Vakuu[®] styles is to combine a stable outer boot, providing security and purchase, with a particularly soft and adaptable inner boot. The special foam is used in the entire boot, thus adapting perfectly to the whole foot. Also particularly impressive is the elasticated GORE-TEX[®] in the heel area, which means there are no seams at the heel.

The AIR-ACTIVE[®] Vakuu[®] footbed adapts to the foot, thanks to a combination of foam and fleece, and it simultaneously provides very good support.

Vakuu Lady Sport II GTX[®]

MFS VAKUUM[®]

The combination of materials makes the difference

Special foam padding

Soft reticulated cuff pads. Reaching as far as the toe area, the foam guarantees a perfect fit.

MFS Vakuu[®] foam

Adapts exactly and without pressure to any shape of foot in the ankle, cuff and tongue areas. Extends to the ball of the foot. The foot is enclosed snugly yet softly.

Seamlessly constructed GORE-TEX[®] lining at the heel

The perfect leisure partner

Soft, comfortable and with a good grip profile, Light Hikers by Meindl ensure delightful walks and leisure excursions.

All styles in this line are produced on a last in the traditional way. This guarantees stability, durability and comfort. The upper leather used is particularly soft yet robust. The edges in the cuff and tongue area are particularly soft, which guarantees the best comfort.

Combined with the sole structure, with a convincingly grippy profile and very good cushioning, this means that it is possible to walk tirelessly over long distances, such as on long-distance hikes.

Light, stable, technical

The styles in the Light Trekking series are characterised by their stability and light weight. This series covers styles for the widest variety of uses, which are all produced using last-built workmanship. The stable structure provides security and the various soles have excellent grip. The styles fit the foot perfectly, thanks to lacing drawn far forward towards the front of the foot. Some styles are also equipped with the variofix® system, which provides an even better hold for the heel.

The highlight of this series is the Litepeak (Lady) GTX® style, which won over all of the testers in the 7/2016 issue of the Alpine Magazine and came out on top as test winner.

Heelcuff-Freeflex

variofix® 3

Higher rubber rand

Litepeak GTX®

perfect grip

variofix® 3-SYSTEM

variofix® 3 System

A successful system has been further developed: The Variofix® lacing system provides a perfect fit – and has proven itself over many years and been continually improved. In the heel area, the Variofix® system that runs around the heel provides good heel positioning. When lacing up, the free-running „Speed Wire“ is pulled in closely and evenly around the heel. This guarantees better support.

Heelcuff-Freeflex

There is an integrated stretch zone in the heel area of the cuff. This makes the entire cuff more elastic. It fits closely but with absolutely no pressure.

Innovative climate competence

Stability with the best climate comfort! We introduced this pioneering technology for the first time 15 years ago. Since then, the Air Revolution® styles have been winners with their high levels of climate comfort and optimised stability in their respective area of use. Thanks to continuous development, the system is still „the“ technology for the best climate comfort in alpine and trekking boots.

Heelcuff-Freeflex

Air Revolution® tongue

Air Revolution 1.9 Lady

EVA shockabsorber

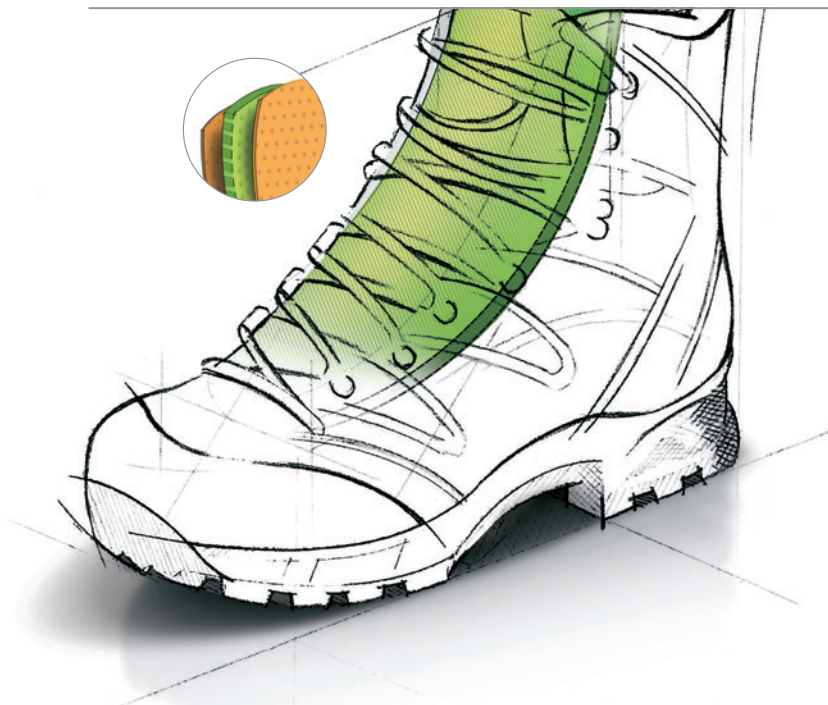

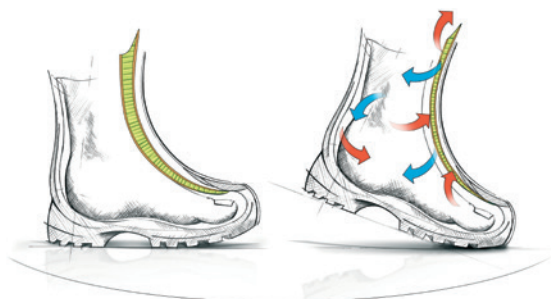

Raised rubber toe

Air Revolution® Technology

The innovation for optimal climate comfort in boots

The tongue adjacent to the foot is a combination of 3D mesh and a permanently cushioning, reticulated and perforated foam. The Air Revolution® tongue extends beyond the top of the boot and facilitates air circulation. It is simply fixed at certain points on the front of the foot and instep in order to support air circulation.

For those striving to reach the summit

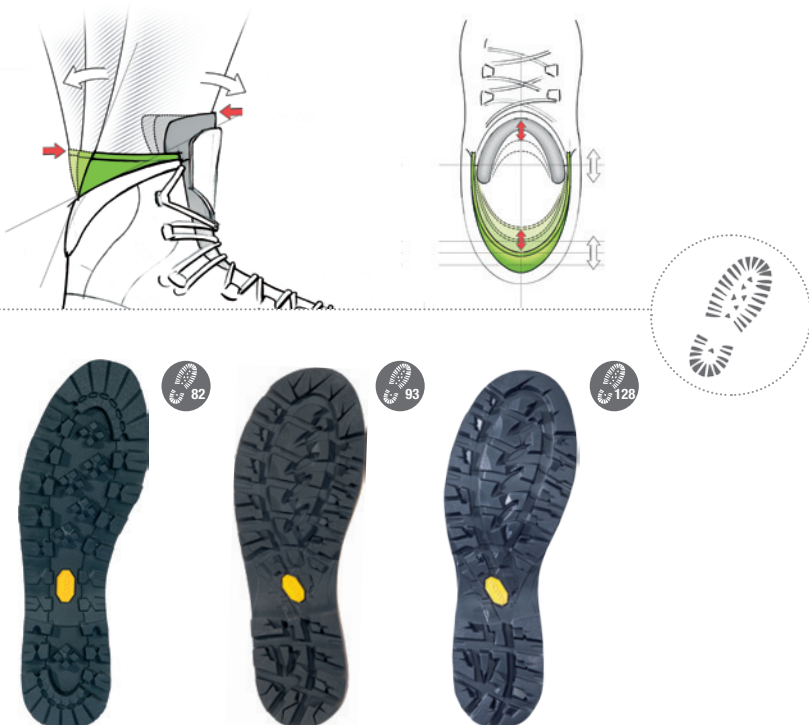

The range of movement required in alpine regions is very varied. In the Alpine group, we have the right style for every activity, from via ferrata boots to alpine boots. The Grivola GTX® is a light, perfectly sophisticated, absolutely crampon-compatible alpine boot, which in addition to good thermal insulation is completely waterproof and is equipped with a highly-functional, no-pressure gaiter with a waterproof zipper.

Alpine Technologies

Ergonomic Fit technology

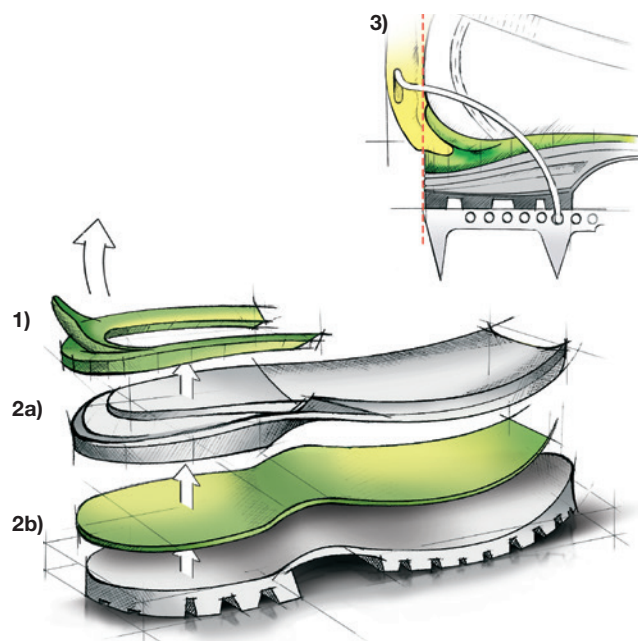

The leg becomes softer towards the top of the boot. The stretch materials in the cuff prevent pressure points and chafing. The new, enclosed tongue-and-cuff system protects the foot against penetration by moisture and dirt. In association with the lacing, this provides a perfect unit with a noticeably pleasant feel.

Alpine sole

The heel spoiler is angled to create a surface for holding crampons without any protrusions, making it possible to tread down and roll off in an economical and natural way.

- 1) TPU heel spoiler
- 2) Two-component cushioning technology
 - a. Light PU liner throughout
 - b. Integrated shock absorber throughout
- 3) No sole protrusion at the heel

A tradition of craftsmanship for over 300 years

Meindl has manufactured shoes and boots of the highest quality for over 300 years. This conviction is why we maintain the workmanship of double stitching. As high levels of experience and skill are required, only a few boot manufacturers are still proficient in this workmanship. Double-stitched workmanship makes boots particularly stable and durable, and can be recognised by the visible double seam at the edge of the boot.

Our trademark is the coat of arms of the Federal Guild Association of German Craftsmanship issued in 1370 by Charles IV, Holy Roman Emperor.

Wellness for feet

The styles in our Comfort fit® line are characterised by our Comfort fit® concept for uppers combined with a special Comfort fit® cork footbed. The special wider shape of the upper provides more space in the area of the toes and balls of the feet with a simultaneously well-fitting heel. The Comfort fit® footbed is additionally equipped with a layer of SOFT PRINT foam, which moulds to the shape of the foot and provides soft cushioning, to facilitate even more comfortable walking.

Comfortfit®

Chromium-free leather lining

Grippy profile

Glasgow

EVA soft step wedge

Comfort fit® boot concept

In comparison to a trekking last, our Comfort fit® last has more space at the front of the foot with a firm grip on the heel. You stand on a wider base. The more defined contour enables easier rollover when walking.

- 1 More room for toes and more capacity.
- 2 More ball width and straight adjustment of the big toe
- 3 Wider stance due to wider sole base
- 4 Perfect fit due to the snug-fitting heel.

More comfort

Our feet, in particular, are seriously stressed each day. This is why it is all the more important to rely on high-quality, well-fitting styles when selecting shoes. The special Comfort fit® upper shape allows more room in the area of the toes and balls of the feet, with a simultaneously well-fitting heel. The wider footing and this „extra“ space ensure optimal wearing comfort. This is supported by the elaborately constructed Comfort fit® cork footbed. The special feature is the anatomically shaped footbed made from cork. In the Comfort fit® Hiking series for 2017, we are offering an even larger selection of styles for trekking and hiking.

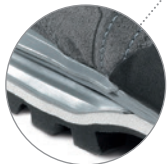

Comfortfit®

Heelcuff-Freeflex

Santiago GTX®

PU shock absorber

Comfort fit® footbed

Long tight lacing

Raised rubber toe

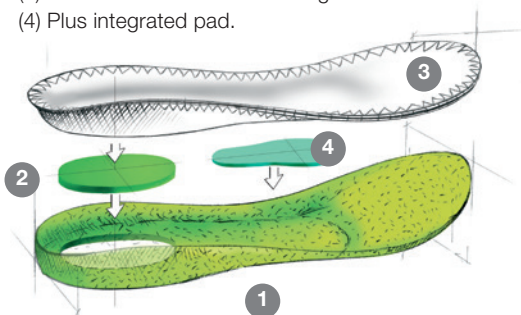

Heelcuff-Freeflex

There is an integrated stretch zone in the heel area of the cuff. This makes the entire cuff more elastic. It fits closely but with absolutely no pressure.

Comfort fit® cork insole

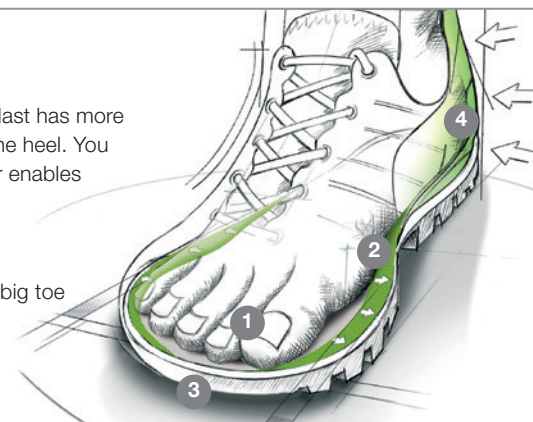

- (1) Cork insole with (2) Poron® shock absorber,
- (3) Cambrelle and fleece covering.
- (4) Plus integrated pad.

Comfort fit® boot concept

In comparison to a trekking last, our Comfort fit® last has more space at the front of the foot with a firm grip on the heel. You stand on a wider base. The more defined contour enables easier rollover when walking.

- 1 More room for toes and more capacity.
- 2 More ball width and straight adjustment of the big toe
- 3 Wider stance due to wider sole base
- 4 Perfect fit due to the snug-fitting heel.

Volume adjustment

Volume adjustment throughout, 2 mm thick. If more space is needed, the padding between the footbed and the inner sole can be taken out. The insole simultaneously works in the shoe as a shock absorber.

For every adventure

Children want to play, romp around and have fun outdoors in every season of the year. Robust, flexible and multifunctional: our colourful styles are exactly what small explorers need for their adventures! We also offer a wide selection of shoes and boots for little ones, from sandals to styles lined with GORE-TEX®. So that the shoes and boots really fit, our children's styles are equipped with the proven Meindl Best-Fit system. The footbeds can be removed and are marked, which makes it easier for parents to quickly find the right size.

Best-Fit Footbed for Children

that children's feet have enough room. Ideally, a child's boot with a perfect fit will be around 12mm longer than the child's foot in the toe area. Our removable Best-Fit footbed allows a simple check to be made to assess whether the boots fits correctly. Children's feet grow up to 1.8 mm per month.

Innovation with GORE-TEX®

The styles in the Meindl Surround group are equipped with GORE-TEX® SURROUND® technology. This technology provides shoes that are breathable and permanently watertight all round. This unique construction ensures dry feet and thus a greater sense of wellbeing.

The heart of the technology in styles X-SO 30 (Lady) GTX® and X-SO 70 (Lady) Mid GTX® is the special sole construction with a continuous spacer, which not only provides air circulation but also generates a very special cushioning effect.

In the new style X-SO Wave II GTX®, we use a development of GORE-TEX® SURROUND® technology. The new sole construction means that air no longer circulates through the spacer but directly through the side openings in the sole. In this way, we were able to design the X-SO Wave II GTX® to be more technical, sporty and stable.

GORE-TEX® SURROUND® Footwear

- Visibly breathable all around and durably waterproof
- Keeps your feet dry and comfortably cool all around
- Ideal for moderate and warmer conditions
- Innovative open sole construction
- Guaranteed!

NEW

A perfect all-rounder

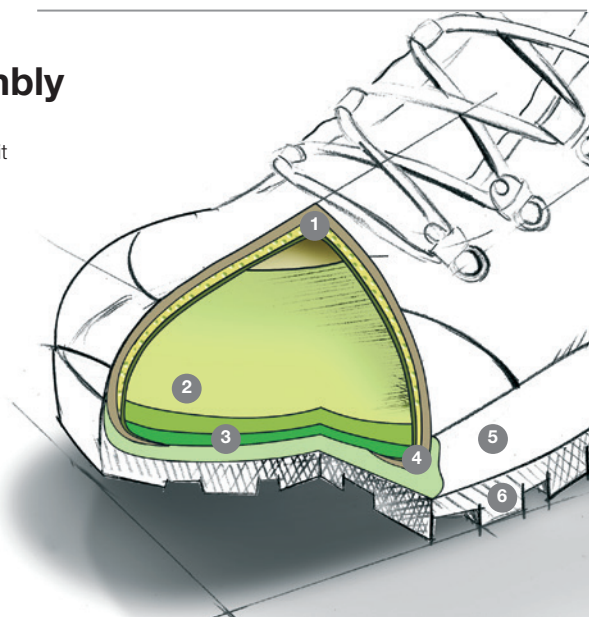

The Trail Activity styles are ideal for sporty enterprises. All styles are equipped with well-cushioned and grippy soles and suit a wide range of leisure activities.

The new Lite Trail GTX® is a winner with its lacing drawn far forward, allowing the shoe to be adjusted accurately to the foot. The special sole is also new. A continuous, soft EVA cushioning wedge, together with the Meindl multi-grip profile, provides both a good grip for the shoe and comfortable walking.

Mounted Assembly

- 1 Foam padding for a perfect fit
- 2 Removable footbed
- 3 Nylon inner sole
- 4 Leather upper fastening
- 5 EVA/PU midsole
- 6 Non-slip rubber tread

Shoes with tradition

Brogues are one of our most traditional items of national clothing. Following this tradition, we produce these using single- or double-stitched workmanship. A great deal of skill and passion is required for this. Only a few shoe manufacturers are still proficient in this complex workmanship. We have always felt it important to maintain traditions, which is why we again have new brogue styles for summer 2017.

Our trademark is the coat of arms of the Federal Guild Association of German Craftsmanship issued in 1370 by Charles IV, Holy Roman Emperor.

The right socks for your shoes and boots

Socks are the closest things to your feet - especially when they're Meindl socks! They have been produced in such a way that they really complement a pair of Meindl shoes or boots. They are designed for various types of use and thus each provide individual benefits. We have individually tailored the system for children and teens, for women and men, for everyday use, for travel, sport and alpine use. Only a sock that really fits makes a boot or shoe perfect.

Meindl – Quality and tradition

It takes the finest leather and materials and innumerable work steps to produce a shoe. The craftsmanship here is given pride of place, and so, as ever, a human stands behind every machine and moves the work process forward, step by step.

We are thus continuing our centuries-old tradition of craftsmanship, creating styles that give customers a reliable companion for unforgettable moments.

At Meindl we take **craftsmanship** seriously.

Setting a double seam

Applying the rubber rand

Milling the side of the sole
